

CASE STUDY

Guaranteed RAF Lift

Cozeva offers customizable Annual Wellness Visit (AWV) and Patient Assessment Forms (PAF) for data-driven HEDIS gap closure and review of suspect and chronic conditions in one visit.

The Results

By using Cozeva’s PAF, *Client A* with over 10,000 Medicare Advantage members saw their Star rating improve by over .5 in two years. This client had nine practices with greater than 70% PAF compliance and each practice had over 100 attributed patients.

| Year | 2018 | 2019 | 2020 |
|---------------------------------|------|------|------|
| Average Increase in Star Rating | 3.42 | 3.47 | 4.1 |

Client A had a RAF Lift in 2020 for 2,565 overall compliant members that were continuously enrolled between 2018 and 2020:

2020 RAF: 1.226

2019 RAF: 1.079

2018 RAF: 0.982

Client B another IPA with over 10,000 Medicare Advantage members used the AWV and had a RAF Lift in 2020 for 4,421 overall compliant members that were continuously enrolled between 2018 and 2020:

2020 RAF: 1.286

2019 RAF: 1.095

2018 RAF: 0.956

Client B submitted 1,987 AWVs in 2018 of which 1,681 patients had any HCC-related diagnosis code. A total of 3,734 HCCs for these 1,681 patients were captured resulting in total RAF at 942.897 or 0.4745 RAF lift per member with an average of \$2,278 Per AWV, and an annual ROI of \$3.97 million dollars.

The Significance

Cozeva's AWV and PAF decreases data entry errors and administrative burden whilst boosting productivity and can provide a major RAF lift for your organization, resulting in a huge return on investment in the millions of dollars.
